OUR ENVIRONMENTAL COMMITMENT

At Varcity Living we are committed to improving our environmental performance and working to maintain the unique natural beauty that makes Bangor such an attractive place to work, live and learn.

We take pride in the local knowledge of our team that comes from living, studying and working in Bangor for many years. We love our city and we know our customers do too.

We are passionate about protecting and maintaining the local area's unique natural beauty and minimising our own environmental footprint while encouraging our customers to do the same.

The first step in our journey has been to audit our office-based activities and look to improve in two major areas; firstly, our office practices and secondly, the impacts our properties have during and after tenancies. These areas have been provisionally targeted to set the groundwork for improvements that could be made in other areas of the business as we look to further our commitment.

We understand that our actions matter and that we can make a difference. That's why we are taking the measures outlined in this statement to innovate and improve our environmental performance, as well as promoting environmental awareness across our firm.

At Varcity Living our commitment is to:

- Implement a sustainable procurement process.
- Integrate technology that minimises resource use & waste.
- Minimise properties' impacts with regards to waste & litter in particular.
- Engage, inform & encourage customers on how they can play their part.
- Promote and engage in initiatives that further environmental causes.
